BAUN™

*The founder:*  
**Alberte Muff**

---

Baun Studio, launched in 2020 by Alberte Muff in Copenhagen, creates colorful and inclusive fashion from recycled materials with a focus on comfort and unique design, all produced responsibly in Ukraine. Alberte Muff, founder of Baun Studio.

*Alberte Muff, founder of Baun Studios*

# OUR *commitment*

---

We strive to be as responsible as possible. Right now, all our shipments are climate-neutral, and we use recycled paper bags for shipping. Any excess material is used to create tube tops and bikinis, so we minimize waste material as much as possible.

This practice not only helps us minimize unnecessary waste but also ensures that valuable resources are used to their fullest potential.

### **Timeless Collection**

In addition to using recycled packaging, we are dedicated to utilizing every resource in our production process. Any excess fabric is carefully recycled into stylish products such as tube tops and bikinis. We make sure to transform these leftovers into stylish and functional items, contributing to a more sustainable fashion cycle. In this way, we reduce our environmental footprint while offering unique and versatile pieces. Each product is sleekly designed to combine modern style with practical functionality, ensuring that our products are both eco-friendly, durable,

and desirable. This approach aligns with our belief in creating timeless collections that withstand the test of time, both in style, quality, and sustainability.

### **Sustainable Production**

Another significant way we reduce waste is by avoiding the traditional fashion cycle. Unlike many other brands that work with seasonal collections, our pieces are available year-round. This approach helps us avoid overproduction and unsold inventory, which often leads to unnecessary waste. By offering our collections all year round, we encourage a more conscious approach to fashion consumption. Our commitment extends to every part of the production process, from the design phase to the finished product. In our production facilities and warehouse, we carefully sort, reuse, and recycle all materials to ensure that no resources are ever unnecessarily discarded or wasted. This waste management strategy is an integral part of our sustainability efforts and reflects our dedication to a respon-

sible, eco-conscious, and ethically-driven fashion industry. We believe that sustainability is not just a trend but a core value that shapes every decision we make.

### **Commitment to Recycled Materials and Continuous Improvement**

Sustainability also encompasses the materials we use in our collections. A significant portion of our products is made from 78% recycled polyester, symbolizing our commitment to reducing our environmental impact. We constantly monitor the development of sustainable fabrics and production processes to make informed decisions. Our dedication to recycled materials is part of our goal to improve our practices and reduce our CO<sup>2</sup> footprint. By continually researching and investing in innovative eco-friendly fabrics, we ensure that our designs not only meet high environmental standards but also remain durable and high-quality.

These properties are carefully selected to ensure that our products not only meet high-quality standards but also offer long-lasting value, comfort, versatility, durability, and elegance for our customers' everyday and special occasions.

### **Quality and Functionality**

In addition to focusing on sustainability,

the materials we use in our products are designed with performance and durability in mind. Our fabrics are constructed to offer essential properties such as resistance to sunscreen and oils, which helps maintain their condition even with frequent use. They also provide excellent UV protection and are highly resistant to chlorine, making them particularly suitable for both swimwear and activewear. These properties are carefully selected so not only do our products meet high-quality standards but also offer long-lasting value, comfort, versatility, and durability for our lovely customers' everyday and special occasions.

*We aim to create fashion  
» that combines «  
sustainable with style*

By prioritizing functionality and environmental responsibility, we aim to create long-lasting, high-quality products that you can enjoy for many years to come. This dual focus ensures that our products combine style and practicality, reflecting our steadfast commitment to quality, sustainability, comfort, and timeless design aesthetics. We believe that fashion can be both functional and responsible, while also innovative, timeless

and versatile without compromising on style, performance, and ethical values and practices.

### **Our Mission**

Ultimately, our mission is to create fashion that is as environmentally responsible, functional and stylish. We are dedicated to making thoughtful choices through-out our production process to inspire others in the industry to follow suit. Our goal is to demonstrate that sustainability and excellent design can coexist and that a commitment to a greater environmental responsibility can enhance the appeal and functionality of our products. By leading the way and continually seeking ways to improve, we hope to influence positive change in the fashion industry. Our mission is to prove it is possible to produce beautiful, high-quality fashion while taking care of our planet, thereby contributing to a more sustainable future for our earth.
